Experience

Ford Motor Company Sep. 2026 – Present
Software Engineer - ML *San Francisco, CA*

- Built model performance dashboards in **Grafana** for Power-Up software updates, tracking accuracy drift across 1M+ vehicles.
- Developed active learning filters for BlueCruise camera data, prioritizing edge cases to reduce annotation costs by 25%.

Arizona State University May 2025 – May 2026
Graduate Research Assistant *Tempe, AZ*

- Scaled an **AWS Lambda + RDS** data pipeline to **300k+** events at **99.9%** uptime, automating ingestion from monthly to daily.
- Deployed a RAG chatbot backend on **AWS Lambda** serving **5,000+** users at **1.2s** latency with schema-validated requests.
- Cut multi-turn compute cost by **40%** through context summarization, payload packing and secure session state management.
- Owned the chatbot and data pipeline end to end as the team's sole developer, from design through production deployment.

Extreme Networks Jul. 2023 – Jun. 2024
Software Engineer *Bangalore, India*

- Achieved **99.99%** state recovery across **100K+** AP devices by architecting a **Java Kafka** pipeline for distributed offline syncs.
- Reduced inter-service latency by **25%** across **1M+** daily requests by migrating Java REST APIs to **gRPC + Protobuf**.
- Designed **Spring Boot** APIs enabling global remote configuration for AP5010 and AP410C access points across client sites.
- Delivered **8** Java Spring Boot data APIs for **20+** NFL/MLB stadium sites, validating 70+ edge cases on flagship hardware.

Nbyula Mar. 2023 – May 2023
Software Engineer Intern *Bangalore, India*

- Cut image load times by **84%** (2.5s to 400ms) by implementing **CloudFront** edge caching and server-side responsive cropping.
- Raised chat DAU by **32%** (3.2K to 4.2K) by fixing **Redis** cache invalidation bugs and optimizing React rendering.
- Migrated local Jenkins CI to **AWS CodePipeline** with Docker-based builds for the platform's backend services.
- Created a Jitsi Meet feature that detects and logs abrupt call exits, giving the team reliable session tracking data.

LoadShare Networks Sep. 2022 – Dec. 2022
Software Developer Intern *Bangalore, India*

- Eliminated manual SQL ops saving 15 min/day by building a **Java Spring Boot** Slack bot with automated query execution.
- Built **Python** scripts to automate SQL ETL workflows, cutting manual effort and speeding up data ingestion.
- Accelerated deployment by **75%** (40 to 10 min) by Dockerizing Java Spring Boot microservices with **CI/CD** automation.

Projects

Chess Bot Data and Serving System | *Python, DuckDB, ONNX, AWS EC2 • Independent Project* | sonuishaq67/chess | lichess/Q_K_V

- Built a Python data pipeline processing **100M+** games via **DuckDB** filtering, UCI tokenization and numpy memmaps.
- Served a 500M-param model at **sub-second** latency by exporting to ONNX and deploying on **AWS EC2** via the Lichess Bot API.
- Deployed live on Lichess as bot **Q_K_V**, reaching about **2500** rapid over **5,800+** games served through the Lichess Bot API.

Amazon Reviews RAG System | *Python, PostgreSQL, pgvector, Neo4j • Class Project*

- Stored and indexed **571M** reviews in **PostgreSQL** with pgvector embeddings alongside a **Neo4j** knowledge graph.
- Boosted precision@10 by **27%** over **571M** Amazon reviews using a hybrid vector + knowledge graph retrieval pipeline.
- Identified a **20%** precision gain from hybrid retrieval via ablation studies against vector-only and graph-only baselines.

Open Source Contributions | *Deskreen, FOSSASIA, xkb-switch* | sonuishaq67

- Merged **27** pull requests across open-source projects, including Deskreen (**20K+** GitHub stars), FOSSASIA and xkb-switch.

RoleReady: AI Mock Interview Platform | *FastAPI, Next.js, TypeScript, Groq LLM, SQLite • Hackathon* | sonuishaq67/RoleReady

- Built a resume-vs-JD analyzer with **FastAPI + Groq LLM** that scores skill matches as strong, partial or missing with evidence.
- Developed an AI mock interviewer that probes user-specific gaps, refusing ghostwritten answers via LLM guardrails.

Technical Skills

Languages Java, Python, Go, SQL, C++, JavaScript, TypeScript, Bash
Data & Backend PostgreSQL, Redis, Kafka, DuckDB, Neo4j, Spring Boot, FastAPI, gRPC, Protobuf
Cloud & Infrastructure AWS (EC2, RDS, S3, Lambda, SQS), Docker, Kubernetes, SLURM, Linux, Terraform, CI/CD
ML & AI PyTorch, Transformers, ONNX, RAG

Education

Arizona State University Tempe, AZ
*Master of Science in Computer Science • GPA: **3.8/4.00*** *Aug. 2024 – May 2026*

Ramaiah Institute of Technology Bangalore, India
Bachelor of Engineering in Information Science *Aug. 2019 – May 2023*
